1.P1

The line graph illustrates/compares (可以修饰名词+主题名词: export value= the value of export; population percentage=the percentage of population)... , **presenting**(呈现了) historical data and predictions. / **categorized by** gender/income/three metals: ... , in 2011...);

The line graph compares the trends in shop openings and closures in one country over an eight-year period from 2011 to 2018.

2.P2

Overall, while all the/both metrics showed considerable fluctuation, there was a general upward/downward trend in (new shop openings) throughout the period, and...; Interestingly,...

Overall, while both metrics showed considerable fluctuation, there was a general downward trend in new shop openings throughout the period, and shop closures experienced a notable trough in 2015 before rebounding. Interestingly, the number of closures exceeded new openings in most years, suggesting a net(净值) decline in the retail sector.

3.P3

It is evident/clear/noticeable that XXX began at, before doing... This was followed by..., marking (the highest point in the period). However,...and then do. (begin/end; top/bottom; up/down; intersection/overtake)

New shop openings began at their peak of approximately 8,500 units in 2011, before plummeting dramatically to 4,000 in 2012. This was followed by a significant recovery to 6,000 openings in 2013, representing the second-highest point in the period. However, this recovery proved temporary, as the figure gradually declined to 4,000 by 2015 and remained relatively stable until 2017, before falling further to 3,000 units in 2018.

4.P4

Regarding XXX, the pattern was markedly different; The most striking feature was..., representing (the lowest point) in the entire period). However, this was immediately followed by.... Subsequently, XXX (begin/end; top/bottom; up/down; intersection/overtake)

Regarding shop closures, the pattern was markedly different. From 2011 to 2014, closures remained consistently high at around 6,000 units annually. The most striking feature was the sharp decline to fewer than 1,000 closures in 2015, marking the lowest point in the entire period. However, this was immediately followed by a dramatic five-fold increase to 5,000 closures in 2016. Subsequently, the closure rate stabilized, maintaining this level through to 2018, which notably exceeded the number of new openings by approximately 2,000 units.
