回答

Describe a goal you set that you tried your best to achieve. 描述一个你尽力实现的目标。

A:

1. 开门见山，直接点明我要说的目标是什么，让考官迅速了解核心内容。

Sure, I'd love to talk about a goal I worked really hard on. **The goal I want to talk about is** publishing my first **research paper** in an international journal. As a university student, this was a huge milestone for me.

当然，我很乐意聊一个我非常努力去实现的目标。我想说的这个目标是，在国际期刊上发表我的第一篇**研究论文**。作为一名大学生，这对我来说是一个巨大的里程碑。

2. 说明设定目标的时间和背景，并解释为什么这个目标有挑战性。

I set this **goal** about a year ago, right after I joined a research project led by my mentor, **Professor Deng**. **To be honest**, it was quite challenging because I was new to **academic writing** and didn't have much experience.

我大约一年前设定了这个**目标**，就在我加入了我的导师**邓教授**领导的一个研究项目之后。**说实话**，这挺有挑战性的，因为我当时对**学术写作**很陌生，也没什么经验。

3. 具体描述为了实现目标所采取的行动，并特别提到导师的帮助，使故事更真实、丰满。

So, what I did was, first, I spent a lot of time reading other papers to understand how to structure my own. Then, I conducted many experiments to get the data I needed. The most important part was getting help from Professor Deng. He gave me so much valuable advice and checked my writing again and again. **Without his help**, I couldn't have done it.

所以，我当时做的是，首先，我花了大量时间阅读其他论文，来学习如何构建我自己的文章。然后，我做了很多实验来获取我需要的数据。最重要的部分是得到了邓教授的帮助。他给了我非常多宝贵的建议，并且一遍又一遍地检查我的写作。没有他的帮助，我是不可能完成的。

4. 结尾部分总结感受，说明这次经历带来的收获，让整个回答更完整。

Finally, after months of hard work, my paper was accepted. I felt absolutely amazing and incredibly proud of myself. It wasn't just about getting the paper published; it was more about the process of setting a difficult goal and achieving it step by step. This experience really boosted my confidence.

最终，经过几个月的努力，我的论文被接收了。我感觉真是太棒了，为自己感到无比自豪。这不仅仅是关于论文被发表了，更多的是关于设定一个困难目标并一步步实现它的这个过程。这次经历真的增强了我的自信心。

What is the difference between goals set by old people and young people? 老年人和年轻人设定的目标有什么不同?

A:

1. 直接给出核心观点，即目标关注点不同，一个关注外部成就，一个关注内心和家庭。

That's an interesting question. I think the biggest difference lies in their priorities. Generally speaking, young people's goals are often more focused on the outside world, like their careers and experiences.

这是个有趣的问题。我认为最大的不同在于他们优先考虑的事情。总的来说，年轻人的目标通常更关注外部世界，比如他们的事业和经历。

2. 用具体的例子来支撑年轻人的观点，比如工作和探索世界。

For instance, a young person might set a goal to get a promotion at work, or maybe to save money to travel the world. These goals are usually about building a future and exploring possibilities.

举个例子，一个年轻人可能会设定一个目标，要在工作上获得晋升，或者存钱去环游世界。这些目标通常是关于构建未来和探索可能性的。

3. 用转折的方式引出老年人的观点，形成对比，并同样用具体例子说明。

On the other hand, older people's goals might shift towards more personal and internal things. **For example,** their main goal could be to stay healthy, or to spend more quality time with their family, like their grandchildren.

另一方面，老年人的目标可能会转向更加个人化和内在的事情。**比如说，**他们的主要目标可能是保持健康，或者花更多高质量的时间和家人（比如他们的孙辈）在一起。

4. 进行总结，点明这种差异是人生的自然阶段。

So, in short, I'd say young people's goals are more about 'achieving', while older people's goals are more about 'enjoying' and 'maintaining'. **It's a natural shift** that comes with different life

stages.

所以，简单来说，我想说年轻人的 **目标** 更多是关于“获得成就”，而老年人的 **目标** 更多是关于“享受”和“维持”。这是一个伴随不同人生阶段而来的自然转变。
