

WRITING TASK 2

You should spend about 40 minutes on this task.

Write about the following topic:

In many countries around the world, rural people are moving to cities, so the population in the countryside is decreasing.

Do you think this is a positive or a negative development?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

原始作文:

With the rapid development of economics, life condition in the city is improved which leads to the a lot of migrations from countryside to cities. Then, the number of residents in the country is decreasing. As far as environment and social welfare are concerned, I endorse that the mentioned migrations are a negative development.

First, increased population in the city damages the local environment. To be more specific, more people means the more personal devices and more industrial productions for daily consumption. The predicted consequence is that more harmful materials are created and appear in the city. For instance, according to the data of Chinese national statistical website, CO2 emission in the city soared

in the decades with increasing city residents, which is bad for climate, and finally evolves to environment problem. Therefore, the population of city should be controlled, instead of continually increasing.

Furthermore, basic function of countryside is not integrate. The basic functions of countryside require people to keep normal running. Under this condition, with decreasing countryside population, there are more and more jobs of basic functions which lacks the people to apply. Then, the quality of countryside residents life cannot be supported. For example, there are so many countrysides in the Africa lacks the doctors. When the local residents get the sick, they cannot get proper medical treatment. Hence, it is vital to keep the countryside population in a certain level which ensure the basic functions.

In conclusion, I reaffirm the conviction that rural people move to cities is harmful, which leaves the series of potential problems in the area of environment protection and social development. The government should make some policies to promote the more distributed populations in the city and countryside to foster a sustainable development.

修改后的作文:

With the rapid development of **the economy**, **living conditions** in **cities have improved**, which leads to **a lot of migration** from **the** countryside to cities.

Consequently, the number of residents in the countryside is decreasing. As far as **the** environment and social welfare are concerned, I **would argue** that this trend is a negative development.

First, **an** increased population in **cities** damages the local environment. To be more specific, more people **mean** more personal devices and more industrial **production** for daily consumption. The **predictable** consequence is that more harmful materials are created and **released into the urban environment**. For instance, according to data **from the** Chinese National Statistical Website, CO2 **emissions in cities** soared **over recent** decades with **the increase in urban** residents, which is bad for **the** climate and finally **evolves into environmental problems**. Therefore, **city populations** should be controlled, instead of **continuously** increasing.

Furthermore, **the** basic functions of **the** countryside **are disintegrating**. The basic functions of the countryside require people to keep **them** running **normally**. Under this condition, with a decreasing countryside population, there are more and more jobs **related to** basic functions that **lack** people to **fill them**. **As a result**, the quality of countryside residents' **lives** cannot be **maintained**. For example, there are many **rural areas** in Africa that **lack** doctors. When local residents get **sick**, they cannot get proper medical treatment. Hence, it is vital to keep the countryside population **at** a certain level which **ensures** basic functions can **operate**.

In conclusion, I reaffirm the conviction that **the movement of** rural people to cities is harmful, **leaving a** series of potential problems in the **areas of**

environmental protection and social development. The government should **implement policies** to promote a more **balanced distribution of the population** between **cities** and **the** countryside to foster sustainable development.

总结:

我们这次的修改主要集中在以下几个方面:

1. 冠词 (Articles: a/an, the): 这是最常见的错误类型。

- **the economy, the countryside, the climate**: 这些通常被视为特定、独一无二的概念, 所以前面要加 the。
- **an increased population, a negative development, a series of problems**: 当你首次提到一个可数的单数名词时, 前面需要用 a/an。
- **in Africa**: 大部分大洲、国家、城市名前面不加 the。

2. 主谓一致 (Subject-Verb Agreement):

- more people mean... (people 是复数, 所以动词用原形)
- ...jobs that lack... (jobs 是复数, 所以动词用 lack)
- ...a certain level which ensures... (level 是单数, 所以动词用 ensures)

3. 名词的单复数与所有格 (Nouns: Singular/Plural & Possessive):

- **living conditions, CO2 emissions, environmental problems:** 这些概念在文中通常指代多个方面或事物，用复数更准确。
- **countryside residents' lives:** “居民的生活”，residents 是复数，其所有格是在 s 后面加 '。

- data from... (来自...的数据)
- population at a certain level (在某个水平上)
- in the areas of... (在...领域)

4. 词语搭配与词性 (Word Choice & Form):

- **development of the economy:** Economics 是“经济学”（一门学科），the economy 是“经济”（一个国家的经济状况）。
- **environmental protection:** environmental 是形容词，用来修饰名词 protection。
- **I would argue that...:** endorse 的意思是“支持、赞同”，但你的观点是反对，所以用 argue (论证) 或 believe (相信) 更合适。
- **...are disintegrating:** 原句 is not integrate 语法不通。disintegrate (瓦解，崩溃) 能准确表达因为人口减少导致乡村功能失效的意思。
- **implement policies:** “实施政策”，比 make policies 更地道、更正式。

5. 介词 (Prepositions):

WRITING TASK 2

You should spend about 40 minutes on this task.

Write about the following topic:

Some university students want to learn about other subjects in addition to their main subjects. Others believe it is more important to give all their time and attention to studying for a qualification.

Discuss both these views and give your own opinion.

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

原始作文:

It is hard to deny that due to the diveristy of optional subjects in university, many students tend to learn various optional cources in addition to main subjects due to their interests. Some students choose to allocate their full time to study and obtain a qualification. In this essay, I will firstly show the merit of learning other subject and then analyze the advantage of passing the qulifications, before concluding my own opinion align more closely with the former.

First, gaining a qulification helps students to find a working opportunity. With the rapid development of technology, more and more workers are repalced by automic processes, causing less jobs leaved for humanity. In this condition, requirements of jobs are impoved a lot which compares to the previous. Among the most jobs, the common form of the requirements is a qulification such as software engineering qulificaiton. A vivid illustration is that students major in

computer science should pass many programming certifications such some programming languages or computer componets and they pay their full time for the knowledge around the certifications.

However, optional cources is good for students' creativity. To be more specific, main subject is core knowledge in the certain major, which lacks a cruial part such as application areas and then students can not apply their ideas. Various optional cources are able to fit for students perference and also supply the application areas for further creation. For instance, a student learn the music production as majority and also learn about artifical intelligence. Then, a smart music production software can be builded which is a great invention in the area of music. Hence, it is vital for student to learn optional classes and borden the horizon.

In conclusion, while focusing on a qualification offers a more direct path to employment, I firmly believe that the long-term benefits of exploring various subjects are more valuable. The creativity and broader perspective gained from interdisciplinary study are ultimately more crucial for personal and professional development in a rapidly changing world.

修改后的作文:

It is hard to deny that due to the **diversity** of optional subjects **at university**, many students tend to learn various optional **courses** in addition to main subjects due to their interests. **Meanwhile, other** students choose to allocate

their full time to **studying for** and **obtaining** a qualification. In this essay, I will first show the merit of learning other **subjects** and then analyze the advantage of passing **qualifications**, before concluding that my own opinion **aligns** more closely with the former.

First, gaining a **qualification** helps students to find a **job** opportunity. With the rapid development of technology, more and more workers are **replaced by automated** processes, causing **fewer jobs to be** left for **people**. Under these **conditions**, job **requirements have improved** a lot **compared to the past**. For **most** jobs, a common **requirement** is a **qualification**, such as a software engineering **qualification**. A vivid illustration is that students **majoring** in computer science **often need** to pass many programming certifications, such as **for** some programming languages or computer **components**, and they **devote** their full time to **learning** the knowledge for these certifications.

However, optional **courses are** good for students' creativity. To be more specific, **studying only a** main subject **provides** core knowledge in a certain major, which **often lacks crucial parts** such as application areas, **making it difficult for** students **to** apply their ideas. Various optional **courses** are able to fit students' **preferences** and also supply application areas for further creation. For instance, a student who **learns** music production as **their major** and also **learns** about **artificial** intelligence **could build** a smart music production software, which **would be** a great invention in the area of music. Hence, it is vital for **students** to learn optional classes and **broaden their horizons**.

In conclusion, while focusing on a qualification offers a more direct path to

employment, I firmly believe that the long-term benefits of exploring various subjects are more valuable. The creativity and broader perspective gained from interdisciplinary study are ultimately more crucial for personal and professional development in a rapidly changing world.

总结:

你这次的论证逻辑非常清晰，特别是两个主体段的论点都很有说服力。结论段写得尤其好，简洁、有力地总结了你的立场。我们这次的修改主要解决了以下几类问题：

1. **拼写错误 (Spelling Errors):** 这是这次最主要的问题，但好消息是，这也是最容易通过仔细检查来改正的。
 - diveristy -> diversity
 - cources -> courses
 - qulification -> qualification
 - repalced -> replaced
 - automic -> automated / automatic
 - impoved -> improved
 - componets -> components
 - cruial -> crucial

- perference -> preference
- artifical -> artificial
- borden -> broaden

2. 主谓一致 (Subject-Verb Agreement):

- optional courses are... (主语 courses 是复数, 动词用 are)
- a student who learns... (主语 a student 是单数, 动词用 learns)
- my own opinion aligns... (主语 opinion 是单数, 动词用 aligns)

3. 名词单复数和词性 (Noun Plurals & Word Forms):

- other subjects (other 后面跟复数名词)
- fewer jobs (job 是可数名词, 所以用 fewer 而不是 less)
- broaden their horizons (这是一个固定搭配, 意思是“开阔眼界”, horizons 用复数)
- 动词形态错误: leaved -> left (过去分词); builded -> built (不规则动词的过去式/分词)

4. 语句结构与地道表达 (Sentence Structure & Natural Phrasing):

- find a job opportunity 比 a working opportunity 更常见。

- job requirements have improved 比 requirements of jobs are improved 更简洁。
- compared to the past 是一个清晰的比较状语。
- for most jobs, a common requirement is... 这样的表达比原文更清晰、直接。

WRITING TASK 2

You should spend about 40 minutes on this task.

Write about the following topic:

The most important aim of science should be to improve people's lives.

To what extent do you agree or disagree with this statement?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

原始作文:

With rapid development of scientific research, frontier science brings many advantages in the area of health and social development. Consequently, Consequently, the question of whether the primary aim of science should be to improve human lives has arisen. From my perspective, as far as health care and technology are concerned, I wholeheartedly endorse this argument.

Firstly, it is vital for human to do further scientific research about health. In history, people got sick and were hard to take the health care due to lacking correspond medicine. That caused high death rate and explained the reason of low population. New types of medicine for various illnesses should be produced after a long process with successful medical experiment. For example, Youyou

Tu explored the Qinghaosu and won the Nobel Prize for her contribution in the area of health. Her research saved a lot of people's lives. Hence, effect of science cannot be ignored in the health of human.

Secondly, science brings many techniques which is convenient for daily life. In many situations, tools are necessary such as an oven for making cookies. Developing science can help tools implement more functions and provide more convenience. For instance, artificial intelligence is most important research fruit in the past decade and make daily devices smarter. Automatic sweeping robots now appear in more houses and save the time of owners, causing that people cannot leave for the robots. Therefore, technical research plays an important role in live today.

In conclusion, I reaffirm my conviction that it is most important to help people improve lives. Government should make a series of policy to encourage scientific research to foster better future.

修改后的作文:

With **the** rapid development of scientific research, frontier science brings many advantages in the **areas** of health and social development. Consequently, the question of whether the primary aim of science should be to improve human lives has arisen. From my perspective, as far as healthcare and technology are

concerned, I wholeheartedly endorse this argument.

Firstly, it is vital for **humans** to do further scientific research **into** health. In **the past**, people **who** got sick **had difficulty receiving** healthcare due to **a lack of appropriate** medicine. That caused a high death rate and **explains** the **low** population **at the time**. New types of medicine for various illnesses **are** produced after a long process **of** successful medical **experiments**. For example, Youyou Tu **discovered** Artemisinin (Qinghaosu) and won the Nobel Prize for her contribution in the area of health. Her research saved **many** people's lives. Hence, **the effect** of science on **human health** cannot be ignored.

Secondly, science brings many techniques **which are** convenient for daily life. In many situations, tools are necessary, such as an oven for making cookies. **Scientific developments** can help tools implement more functions and provide more convenience. For instance, artificial intelligence is **the** most important research **breakthrough** in the past decade and **makes** daily devices smarter. Automatic sweeping robots now appear in more houses and save the time of owners, **making them indispensable in many households**. Therefore, technical research plays an important role in **life** today.

In conclusion, I reaffirm my conviction that **helping people improve their lives is of the utmost importance**. **The** government should **implement** a series of **policies** to encourage scientific research to foster a better future.

总结：

词语搭配与地道表达 (Collocation & Phrasing): 这是这次修改的重点。有些表达受到了中文思维的影响，我们把它们调整得更符合英文习惯。

- **research fruit -> research breakthrough:** “研究成果”在英文里没有直译的 fruit，更地道的说法是 breakthrough (突破), outcome (成果), 或 finding (发现)。
- **were hard to take the health care -> had difficulty receiving healthcare:** 这是更自然的表达“看病难”的方式。
- **people cannot leave for the robots -> making them indispensable:** 原句的字面意思不通，修改后的句子能准确表达“人们离不开它们”这个意思。
- **health of human -> human health:** 这是更简洁、更常见的说法。

冠词 (Articles: a/an, the): 老朋友了，但依然是提分的关键。

- the rapid development, a high death rate, the most important..., a better future. 定冠词 the 和不定冠词 a 的使用需要持续关注。

主谓一致 (Subject-Verb Agreement):

- techniques which are... (主语 techniques 是复数)
- AI ... makes... (主语 Artificial intelligence 是单数)

名词单复数 (Noun Plurals):

- for humans (指代“人类”这个群体)

- medical experiments (通常指多次、多种实验)
- a series of policies (policy 的复数是 policies)

WRITING TASK 2

You should spend about 40 minutes on this task.

Write about the following topic:

In some countries, more and more people are becoming interested in finding out about the history of the house or building they live in.

What are the reasons for this?

How can people research this?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

原始的作文：

In recent years, there has been a noticeable increase in learning about history of lived house. This phenomenon is caused by a variety of factors, including safety and culture requirements, and there are substantial methods for people to collect relative information about the house.

First and foremost, history plays a vital role in safety of house, as reflecting the building process of the house. To be more specific, different construction methods can effect the house quality and people can learn the specific method from house's history; In addition, whether the house experience some natural catastrophe is also an important aspect, verifying the reliability.

Furthermore, the fact that history is crucial for traditional culture indicates that old houses of celebrities are regarded as scenic spot. Take the case of House of

Lao She, which recorded his life and provided a vivid image of Lao She. As a result, more and more people are attracted by history of house, which has contributed to focus on their own house. Hence, history of house becomes a way to improve person knowledge especially in the traditional or local culture.

People can obtain historical details of house through several effective avenues. Firstly, library can be an available way, as holding many historical books. Secondly, old neighbors yield insightful information. Lastly, people can use Internet to search relative information such Wikipedia.

In conclusion, as far as safety and culture are concerned, people have diverse reasons for interests of house history. They can collect historical details through Internet conveniently.

修改后的作文：

In recent years, there has been a noticeable increase in **people learning about the history of the house they live in**. This phenomenon is caused by a variety of factors, including safety and **cultural** requirements, and there are substantial methods for people to collect **relevant** information about **their** house.

First and foremost, history plays a vital role in the **safety of a house**, as **it reflects** the building process of the house. To be more specific, different construction methods can **affect** the house's quality, and people can learn the specific method from the **house's** history. In addition, whether the house **has experienced any** natural **catastrophes** is also an important aspect, verifying its

reliability.

Furthermore, the fact that history is crucial for traditional culture indicates that old houses of celebrities are regarded as scenic **spots**. Take the case of **the** House of Lao She, which **records** his life and **provides** a vivid image of Lao She. As a result, more and more people are **attracted** by the history of **houses**, which has contributed to **a focus** on their own **homes**. Hence, the history of a house becomes a way to improve a **person's** knowledge, especially **of** traditional or local culture.

People can obtain **historical** details of a house through several effective avenues. Firstly, **libraries** can be a **useful resource**, as **they hold** many **historical** books. Secondly, **long-time** neighbors **can** yield insightful information. Lastly, people can use **the** Internet to search **for relevant** information **on websites such as** Wikipedia.

In conclusion, as far as **safety** and culture are concerned, people have diverse reasons for their **interest in** house history. They can collect historical details conveniently through **the** Internet.

总结:

拼写错误 (Spelling Errors): 这是最需要注意的地方, 一些小错误会影响文章的整体印象。

- attached -> attracted

- historicial -> historical
- libarary -> libraries
- satety -> safety
- **特别注意:** effect vs affect。Affect 是动词 (影响), Effect 通常是名词 (效果, 影响)。在你的句子中, 需要的是动词, 所以用 affect。

冠词 (Articles: a/an, the): 这是我们一直在练习的重点, 这次依然有一些地方可以提升。

- the safety of a house: “一栋房子的安全”, 泛指。
- the Internet: “互联网”是专有名词, 前面要加 the。
- the House of Lao She: 特定的建筑或地点前通常加 the。

用词准确性与地道表达 (Word Choice & Phrasing):

- history of lived house -> history of the house they live in / history of their homes。lived house 是一个中式英语的表达, 英文中没有这种说法。
- relative information -> relevant information。Relative 是“相对的”, Relevant 是“相关的”, 这里需要的是后者。
- scenic spot -> scenic spots。“景点”是可数名词, 这里指代的是一类地方, 所以用复数。

- improve person knowledge -> improve a person's knowledge。名词所有格，表示“一个人的知识”。

句子结构 (Sentence Structure):

- ...as reflecting... -> ...as it reflects...。加上主语 it，句子结构更完整。
- ...as holding... -> ...as they hold...。同理，补上主语 they。
- search relative information -> search for relevant information。search for 是一个固定搭配，表示“搜寻”。
